## **DETAILED ACTION**

### ***Double Patenting***

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-7 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-7 of prior U.S. Patent No. 6,626,448. This is a double patenting rejection.

### ***Allowable Subject Matter***

2. Claims 8-14 are allowed.

### ***Response to Arguments***

3. Applicant's arguments filed 01/04/05 have been fully considered but they are not persuasive.

Applicant's main argument is that since claims 1-7 of the present application were amended to change the word "operator" (from U.S. Patent No. 6,626,448) to

Art Unit: 3611

"user", that these claims cannot now be rejected under 35 U.S.C. section 101 as claiming the same invention.

Firstly, the word "user" appears only in the preamble of Applicant's claims as part of a recitation of how the apparatus is *intended to be used*. A recitation directed to the manner in which a claimed apparatus is intended to be used does not distinguish the claimed apparatus from the prior art - if the prior has the capability to so perform.

MPEP 2114 and *Ex parte Masham*, 2 USPQ2d 1647 (1987). Claims 1-7 of U.S. Patent No. 6,626,448 are identical in every way, shape and form to claims 1-7 of the present application except as to this intended use recitation.

Secondly, the very structural recitation of the claimed limitations taken in conjunction with the teaching of the specification and drawings show that there is only one disclosed exhaust pipe protector and footrest. This is not some case where there are multiple locations of footrests and exhaust pipe protectors. The exact same structure is disclosed in 6,626,448 and claims 1-7 of the present application. The only difference, whatsoever, is who the intended person is who will "use it". This is not a patentably distinguishing type of feature of an apparatus claim because there is no way to quantify and define who the user of the apparatus is going to be. It could be the driver of the motorcycle. It could be a second passenger. It could be a third passenger. It could even be a person not even seated on the motorcycle. None of these "intended users" are patentably definitive to grant separate patents for the various users. Without some structure patentably defining different scopes, the rejection under 35 U.S.C. section 101 must be maintained.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
